Mission Statement

Our mission is to provide comprehensive medication assisted treatment for opioid use disorder and other health care services to foster wellness, longevity and socially responsible behavior for the patients we serve.

Vision

We will be the national leader in medication assisted treatment for opioid use disorder by creating Centers of Excellence for addiction treatment and integrated primary health care with unparalleled quality of care.

Values

Accountability: We take ownership of our results and strive to improve.

Service: We provide exceptional customer service to our patients, families and fellow team members.

People: We believe that our employees are the greatest asset. We work as a team to provide the best care to our patients in a respectful, honest and compassionate manner.

Integrity: We strive to do the right things in an ethical and responsible way.

Respect: We promote an environment of mutual support and respect.

Evidence Based Practice: We focus on the integration of clinical expertise, patient values and research outcomes to make decisions regarding patient care.

Activities and Accomplishments

This past year MedMark in Washington, PA saw a decline in growth. We ended our year with 259 patients enrolled in our program. We continue to operate methadone at our program.

Washington's program is accredited by CARF.

This year we began to offer additional supportive services such as group counseling. Additionally, we have partnered with local social service agencies such as the "Center of Excellence" to provide our patients with case management services; as well as continuing to partner with "Central Outreach" to provide testing, treatment and education to our patients on HIV/Hepatitis.

We began working with Sonara in 2024 in the development of a program to help patients become eligible for take home bottles through the utilization of an online dosing window. The Sonara program will be launching in March of 2025, both staff and patients are eager for the program to begin.
